with craftable display boards!

Down to a Science

{CREATIVE INSPIRATIONS *free* FROM HOBBY LOBBY.}

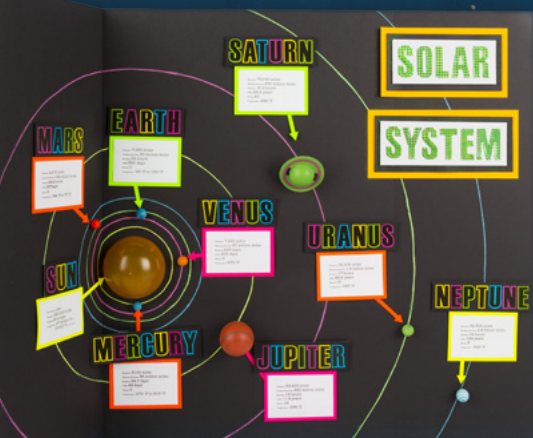

## Star Power

Create an out-of-this-world project with a display board, tape, poster board and paint. For the shooting star, cut a star from poster board and add duct tape streamers. Add extra wow with a night sky projection kit (Hobbies Dept.).

## Better off Thread

We embroidered our constellations with a simple backstitch—metallic thread really makes them twinkle! Then we backed starry craft tape with poster board and punched out circles for stars. For a 3D effect, we layered them on foam adhesive.

## All Systems Go

Here's a star-studded project for you planetary pros! Use chalk markers to draw circles that represent the distances between the planets. Then use neon stickers to spell out the planets and holographic stickers on layered poster board for the title.

## Make it Medieval

Here's a right-on-target idea: Pick up a catapult kit, and create a castle out of display boards embellished with craft tape and poster borders.

**Castle and moat:** craft tape  
**Water:** wave poster borders  
**Targets:** tape-covered circles with marker-drawn rings

## Rock It to Me

For this rockin' display, draw the crystal shapes on a board and cut out the design with a craft knife. Then add glitter and holographic stickers to make it sparkle. For some extra dazzle, make your own crystals with a kit from the Hobbies Dept.

## Life as Art

Let your creativity fly on a butterfly life cycle presentation. Make a tree out of crumpled paper, and then add the butterfly stages. Use pompoms for the eggs, folded and wrapped chenille stems for the larva, and tape-wrapped pompoms for the pupa.

## All That Glitters

They say no two snowflakes are alike, so make yours as unique as you are! Add glittered accents in whatever pattern you like for a truly authentic presentation.

## Snow and Tell

To make this cold-as-ice project, we cut out snowflakes and clouds from sturdy Bristol paper. Then we glued wavy poster board to the bottom, drew rain squiggles with a marker, and added glittered cardstock snowflakes.
