

a little birdie told me

{CREATIVE INSPIRATIONS free FROM HOBBY LOBBY  $\bullet$ }

## » BEST: DRESSED NEST

Hop over to this charmer, and you'll be happy as a lark in no time. Its cheery disposition hails from a sunny shade of pink and some natural die-cut wood pieces from the Papercrafting Department—we glued them to the roof, added them as accents around the cubbyholes and trim and used them as bird perches.

# FOR THE BIRDS

Craft your very own birdie sanctuary. We roofed the white house with copper sheets, rolled at the ends.

Then we mounted a hand-painted chalkboard label onto copper and hung it with jewelry wire.

In the foreground, we adhered detailed wood trim and a fleur-de-lis, then colored the wood with acrylic gel stain.

# » NO PLACE LIKE FLOWN

For this nostalgic nook, add flowers, a front porch and house numbers from the miniatures section of our Craft Department. The roof features painted square shingles, lined with handpainted trim to match the welcome sign. And the green-and-white color combo says, "Home Tweet Home!"

# « BLOOM ROOM

For the base of this chirp-ready home, we covered a block of wood with floral moss and adhered the birdhouse to the base. At the back, we added a miniature window and flower box, complete with blooming roses!

**Tip:** Paint a square of the wood in a complementing color where the window will be placed—it hints at the idea of a decorated interior.

#### « INTO THE WOODS

Place pre-made woodland characters and a whimsical number 3 onto a simple gray and green backdrop and you've got the perfect resting spot for furry forest friends. We adhered diamond tread aluminum sheeting to the roof and added some stones at the bottom of the house for dimension.

#### » CALL ME QUAINT

Try this nestled-in-a-field villa for your patio or birdbath garden. The gold house numbers give it a lived-in feel, and we're in love with the peekaboo painted brick. To make the roofing tiles, scallop sandpaper sheets and layer as shown. Then set the scene with mini flowerpots and mounds of floral moss.

#### « TOADSTOOL TIME

This critter-friendly cottage (frontside shown on cover) can be as easy as dip, brush, repeat—we created the whole gnome-inspired hideout with just a few colors of paint! Try adding details like the curvy, curtained window you see here or an onlooking woodland gang.

**Tip:** Use a variety of brush sizes—small for animals and blades of grass, large for all-over roof coverage.

### » HOME ON THE RANGE

This vintage farmhouse (shown on cover) sets our hearts aflutter. Near the propped-up mini-bike, we set up a small cornfield and cluck-ready chicken coop—you can find the corn and chickens near the model-making supplies. For a charmingly country roof, we ran tin sheeting through a corrugating crimper from the Papercrafting Department.

#### « GREEN ACRES

To create your own authentic homestead, try some of these finishing touches:

- Clothesline: tiny tie-dyed fabric on jewelry wire, wrapped around dowel rods
  - Chicken coop: cut-to-fit balsa wood, roofed with corrugated tin sheeting
    - Stairs: small slats of balsa wood glued to a larger, rectangular piece
      - **Display pedestal**: wooden cake stand lined with cork for a level surface
        - Grass and gravel: from the model-making supplies (Hobbies Department), glued onto the cork
