

Turn a
Rustic Metal Lantern

into customized, light-up-a-room décor.
We'll walk you through it.

a new light

{ CREATIVE INSPIRATIONS *free* FROM HOBBY LOBBY. }

Supplies:

- Antique metal lantern with handle
- Assorted acrylic paints
- 18kt. gold leafing pen
- Sponge brushes
- Painter's tape
- Paint cup
- Pattern templates (provided)

1

(A) To remove glass, gently open tabs on left, top and bottom of each side of lantern. Carefully slide out glass, and set aside.
(B) Paint lantern desired color, and let dry.

2

Print pattern template, and place it on a flat surface, taping down the edges to secure. Now center a piece of glass over desired section of pattern, and tape glass down. Carefully trace pattern onto glass using gold leafing pen, and let dry overnight. *Tip: If you make a mistake, simply use a wet cloth to wipe off the paint before it dries.*

3

Once dry, turn glass over so design faces down. Paint back of glass desired color with a sponge brush, blotting the paint to avoid visible brush strokes.

4

Use gold leafing pen to color decorative trim.

5

Carefully place glass back in lantern, alternating colors and patterns as desired.

Let your creative genius shine for all the world to see!

Scale patterns to desired size before printing.
