CHARM IN CHARM

Every gorgeous tablescape starts with a few essentials—whether you're decorating for a wedding shower, a holiday dinner or Saturday breakfast. So to make the occasion ultra special, just take those basics up a notch with dangly jewels, metal pendants, sparkly crystals and hints of fabric.

THOUGHT BAUBLE

Add beads, crystals and bits of white lace to a stark wire votive holder, and you have a look that crosses romance with utility—and it works.

JEWEL RUNNINGS

Burlap is a must on a shabby sweet table. But we glammed it up a bit with a dainty strip of jewelry-embellished fabric and a dances-in-the-light brooch. And just like that, a little burlap became an über-classy table runner.

STAR FLOWER

Elevate sweet treats—and we mean that literally—by arranging them on a made-to-order dessert pedestal. All it takes is a rose-dotted mirror, a creamy dreamy candleholder and a handful of beads.

SWEET BEADS

Sure, you could leave the mirror as is—it comes ringed with roses. But where's the fun in that? For a delightfully DIY look, add a different bead or bauble to the center of each flower. It doesn't get any sweeter than that!

FIT TO BE FLY

Let your creativity take flight on these personalized place settings. To make this buzzing beauty, we simply glued a dragonfly brooch to an antique spoon handle pendant. But we've got a dazzling array of brooches, pendants and other pretties to choose from, so you can make every napkin ring as unique as your guests.

ON A ROLL

Make napkin rings from cup chain-embellished fabric strands (sold ready to go) and metal flower pendants. Then display in a no-frills wire basket.

DANGLE ANGLE

Use wire cutters to remove the pins from these ultra-glamorous brooches. Then secure them to the wastebasket with jewelry wire. *Tip: If your brooches seem loose or wobbly after they're attached, use clear thread to better anchor them to the lamp.*

METAL MASH-UP

Industrial glam. It's about hard-meets-soft, fancy-meets-factory, and metal-meets-chic—and jewelry components are a great way to get the look at home. This hanging lamp was made with a pendant light kit, a metal wastebasket, some aluminum sheeting and twelve ornate crystal brooches.
