t-shirt time

{CREATIVE INSPIRATIONS *free* FROM HOBBY LOBBY®}

## SEA TIME

For this maritime design, we made an anchor stencil (scroll to page 7 for template) out of freezer paper and ironed it on. Before we peeled it off, we sprayed the shirt with glitter fabric dye. Just add a sailor hat and some canvas flats, and you're ready to set sail.

## TRIBAL TEE

Haven't you heard? Tribal is in! So get in on the trend with a colorful stylish-in-symbols tee. We used a mix of stencils (Crafts Dept.) and freehand designs—all applied with fabric paints. Feel free to improvise with your own patterns and drawings.

## #3 TYPE CASTING

Love this better-than-boutique tee? Pick up an at-home screen-printing kit, grab a t-shirt and print off your favorite design. Then just follow the kit instructions and you'll have a closetful of one-of-a-kind tees in no time!

## #4 UNDER THE FEATHER

A plain white tee doesn't have to be so-so. Dress it up with fabric markers—in a feathery tangle of purples, greens and a hint of neon—and it becomes so vogue! Don't be afraid to get creative with your designs, colors and t-shirt styles.

## PINK TANK

Take your walk across the stage, 'cause you're a Fashion School grad in this swanky tank! First we cut the sleeves off a t-shirt and gathered it in the back. Then we embellished it with a cluster of whisper-light fabric flowers. Talk about summertime style!

## BAUBLE TO BAUBLE

Pretty up a basic black tank with a collection of blingy accessories. We simply stitched on beaded embellishments, rhinestone clusters and an artfully draped strand of pearls. With a shirt this sparkly, there's no need for jewelry!

## BLESS MY BOA

Never underestimate the outfit-altering power of a quirky accessory—which is exactly what this petal-decked plume has! And the best part? The embellishment is detachable for easy laundering, thanks to velcro on the boa ends and shirt straps.

## GEM ME UP

You have the right to remain fabulous—and this rock-star tank will get you there. Simply iron on iridescent heat-set gems in the design of your choice (we went with a cascading starburst-inspired look). Then get ready to rock the runway!

## OUTSIDE THE FOX

What does the fox say? We're glad you asked, because this sly guy says "I'm trendy and I know it!" Just use iron-on nail heads and our template (page 8) to make your very own foxy friend.

## STRAIGHT & NARROW

What's trendy and gold and stylish all over? This arrow-adorned tee that'll make your heart quiver!

We used a freezer paper stencil, a sheet of silk-screen foil, foil and glitter adhesive and gold fabric paint to get this made-for-Midas design.

## CLOTHES CALL

All you need is love (oh, and some deep red fabric glitter) to make this lucky-in-luxe tee. Draw your design on the shirt, and fill it in with foil and glitter adhesive. Then sprinkle on a generous helping of glitter. The end result is simply stunning.

## THAT'S A SCRAP

T-shirt DIYs are all the rage these days. And when your crew neck crafts are complete, you're often left with a pile of scraps—hems, sleeves and such. So grab all your gals for a t-shirt palooza, and turn those leftover pieces into a funky-fun banner by simply knotting them to a length of twine.
