**one man's trash...** once a ho-hum wooden trashcan—now custom décor! This sunny project began with a simple coat of yellow paint. We then added a stunning mosaic design to the front panel. See "Picture Perfect" below, on how we did it!

**picture perfect...** Let your inner artist shine by adding stylized designs to your mosaic projects. We created this simple grape and leaf motif by placing mosaic gems to form grape clusters, and shards of tile to create the look of stems. Pre-formed glass tiles in shapes of butterflies and leaves finish off the design. Then just fill in around design with more tile shards, keeping colors tonal to accentuate your design. *Tip: You can sketch your design in pencil first, if you prefer perfect placement.*
