

It's time
for the
**BIG
TIME!**

Use our giant
clock kits
to create
one-of-a-kind,
über-sized
designs!

sign of the times

Now that's what you call a true "sign of the time!" This antique find has a whole new life as a chic, oversized clock. There's nothing to the one of a kind look. Simply paint the clock components to match your space. Then, mount them according to the manufacturer's instructions.

knock on wood

Why toss it when you can clock it? It's easy to turn anything (like this castoff wooden pallet) into a funky timepiece with our handy oversized clock components. We used a word-processing program to make our own oversized number stencils for this look. And we painted the clockworks silver before mounting them to the wood.

« forest flourish

This whimsical woodland wall clock was traced onto foam board with the help of an art projector—the image is from a book of clip art. The cheery color comes from simple acrylic paint. **Tip:** *Paint can cause foam board to curl. To keep ripples to a minimum, paint both the back and front of your design.*

button up »

Quirky and cutesy . . . that's what we wanted for this oversized clock. So, we topped it off with a pair of bright plastic buttons. A few dots of hot glue held them perfectly in place.

« making peace

We went lightweight for this way-out wall clock. The base is made from simple foam board. We traced the clip art image with the help of an art projector. Then, we carefully cut out the shape with a craft knife. To finish, we découpagé our handiwork with groovy wrapping paper, layering bits of tulle here and there for texture. *Tip: Ready to peace out this project for yourself? You'll find foam board and a selection of art projectors in our extensive Art Department.*

lend a hand »

Our tie-dye timepiece wouldn't be up to the minute without these wall-size clock components. To keep to the colorful theme, we altered the clock hands and base with sparkly blue glitter—we used a spray adhesive for quick and easy coverage. Then, we mounted them according to the manufacturer's instructions.

Playtime Turns Schooltime!

This project is perfect to help teach kids how to tell time.

« zoo view

That kid is all about the animals! And that's why he'll love this whopper of a clock. The sunny base is painted foam board. And the cute little critters? They're ready-to-go wooden embellishments, available in the Craft Department.

≈ felt the glow

Your tick-tot timepiece is all about the bright-as-day details. Draw on a happy face with a permanent marker, and add pops of color (like rosy cheeks and pointing fingers) with felt!

« **TIP:** We used the numerals that came with the wall clock kit. To customize them for this project, we painted them green and adhered them to pre-painted wooden tiles.

for reel

Looking for your ticket to dramatic décor? We suggest larger than life film reels giant, one of-a-kind clock! The metal wall decorations are available in the Home Accents Department.

We used E6000® epoxy to assemble them into a sculptural design, complete with 12" clock hands. *Tip: Our oversized clock components come in basic black, but a coat of acrylic paint can customize them to coordinate with any décor.*

TIP: We used a plastic plate for the center of our design. That meant that we could use a heat gun to melt a hole in the dish to accommodate the clock mechanism. Easy!

on your plate

Who could help but think the world of this stunning, oversized timepiece? For a similar look, try découpageing thirteen clear plates with a map of the globe—use a copy machine to reduce or enlarge the image as desired. Install oversized clock hands on one plate. Then, plot a course to your favorite wall, and hang the rest of the plates as shown.

Frame Aim Let's call this giant clock a "collage homage." Round up an eye-catching collection of frames—we've got plenty to choose from in the Home Accents Department.

Then, make them pop with paint, photos, fabric and anything else that floats your artistic fancy. Arrange the frames around our king-size clockworks...and you're done!

Hand Plan Don't forget to customize your clock kit to coordinate with your one-of-a-kind design. For our look, we covered the base with fabric. Then, we used acrylic paint to turn the hands the perfect shade of deep mahogany red.

Cork Out » Pre-cut cork tiles, mounted on simple foam board, make up the checkerboard motif on this handy message center. We loved the look, but we thought...it needed a clock! We went for smallish clock hands this time. They point to vintage-style numerals mounted on ticket stub embellishments, available in the Scrapbooking Department.

» **Chalk Up** This look is corkboard-meets-chalkboard-meets-giant clock! The imaginative design is built on basic foam board. We covered the board with rolled cork (available in the Craft Department). Then, we sprayed the cork with chalkboard paint. After that, we installed the clockworks and popped the piece in a coordinating frame. *Tip: We drew our numerals with ordinary chalk.* Go for acrylic paint if you want a more permanent design.
