Tickled Pink It's a love note to the sweetest color on the planet—a deco mesh wreath decked in pink! For a look like this, try tucking in little pretties like silver ribbon, foil garland, and puffy heart ornaments. Use glue and/or floral wire to hold the doodads in place.

These special wreath bases come with pre-attached wire fronds to hold your expert wraps, twists and bunches in place. They work just like floral wire, but they're a bit easier to maneuver when you're up to your elbows in gorgeous Valentine's Day mesh.

CAUTION: Deco Mesh is only to be used with LED candles. Do not use open flame candles.

Red Hot You've gotta see a little red on Heart Day, and a curly deco mesh wreath should just about fit the bill. To make a piece like this, roll the mesh into individual curls before attaching it to the wreath base. Then add an assortment of lovey-dovey embellishments.
