## Filled with Features

Multiple Mat Cutting: Cut as many images as you want, even if the images won't all fit on one mat. Simply input the number of images you'd like, press **Cut**, and the machine will prompt you when to load the next mat.

Cricut Wireless Adapter (optional accessory): Wirelessly connect your Cricut Expression® 2 machine to the Cricut Craft Room™ application to make it easy to cut and get wireless updates for your machine.

Material Setting: Choose a default setting for materials you like to cut (light paper, medium paper, heavy paper, and vinyl) or customize a material setting just how you want it.
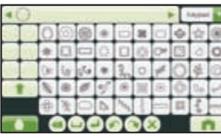

Independent Image Sizing: Size each image on a mat on its own! Make one image 3", another image 5 ½", and so on—all on the same mat.

Compatible with Cricut® and Cricut Imagine® art cartridges.
(Cricut Image® cartridges will just cut images, not print images or patterns.)

Apply All: Apply all the edits (scale, flip, rotate, etc.) you do for one image to all the images on a mat at the same time with just one button.

Keypad View: See all creative features and layers right on the screen, including shift layers. No need to keep referring back to the handbook!

Pre-loaded Images

Cricut Alphabet cartridge
This delightful cartridge is filled with a variety of fonts, plus a selection of layered images. It will be easy to jazz up your scrapbook layouts, home décor, cards, and other creative projects with this cartridge.

Cricut Essentials cartridge
This cartridge is filled with fundamental designs such as swirls, leaves, flowers, and more. You will love all the different ways you can use these images to create fun party decorations, unique handmade gifts, and other creative projects.

Creating Has Never Been Easier

We've given the machine a full-color LCD touch screen so it's faster and easier to find the images you want to cut. Use vinyl, magnet material, thin chipboard, fabric, cardstock, paper, and other materials to create cards, scrapbook layouts, home décor, and other creative projects.
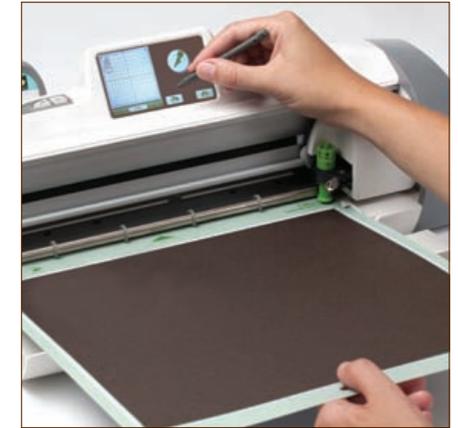

Vinyl

Magnet Material

Thin Chipboard

Fabric
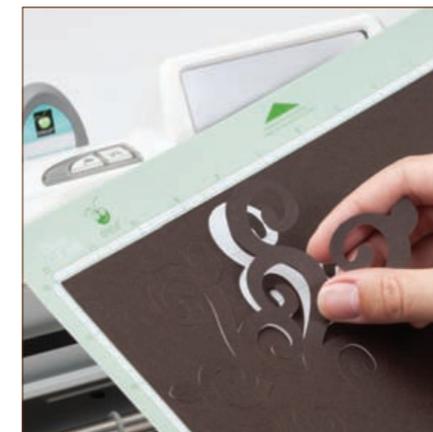

Cardstock and Paper

❶ Insert a Cricut® cartridge.

❷ Press the **Image** button. Select an image to add it to the Image Queue.

❸ Select material and tool settings. Place cardstock or other material on cutting mat. Load mat into machine.

❹ Press the **Cut** button. Verify tool settings. Press **Cut** again.

❺ Unload mat. Remove cut images from mat.

❻ Assemble the project.
